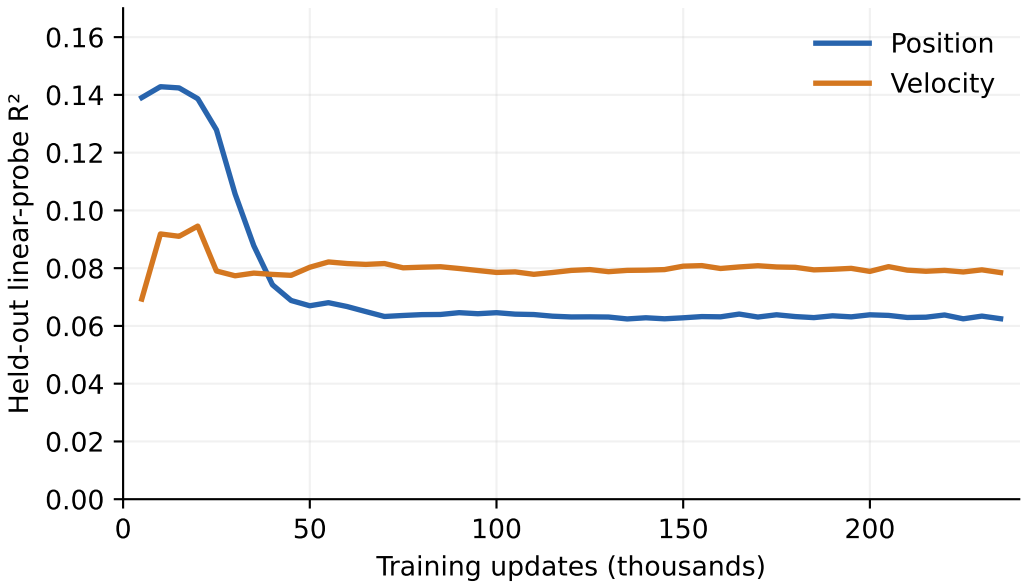
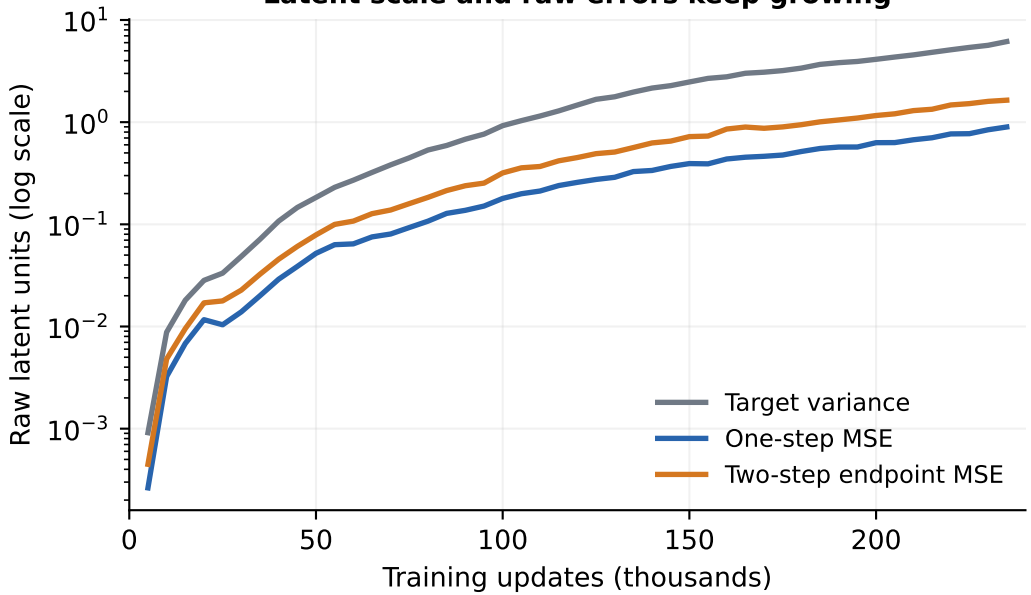
causal_jepa · dense visual stage · o376vjsf

47 held-out evaluations through 235,000 / 300,000 updates

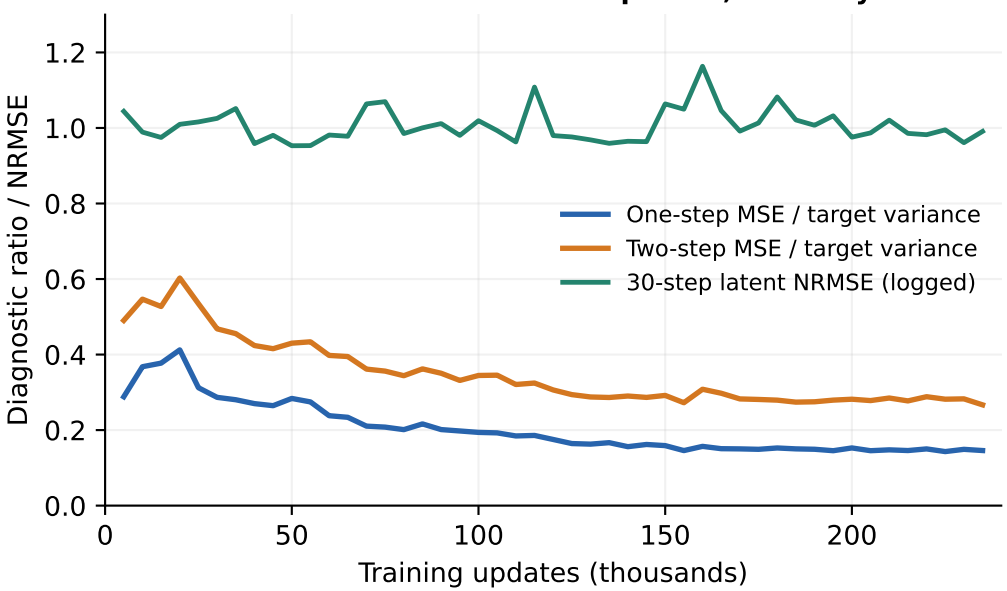
Physical-state decoding has plateaued



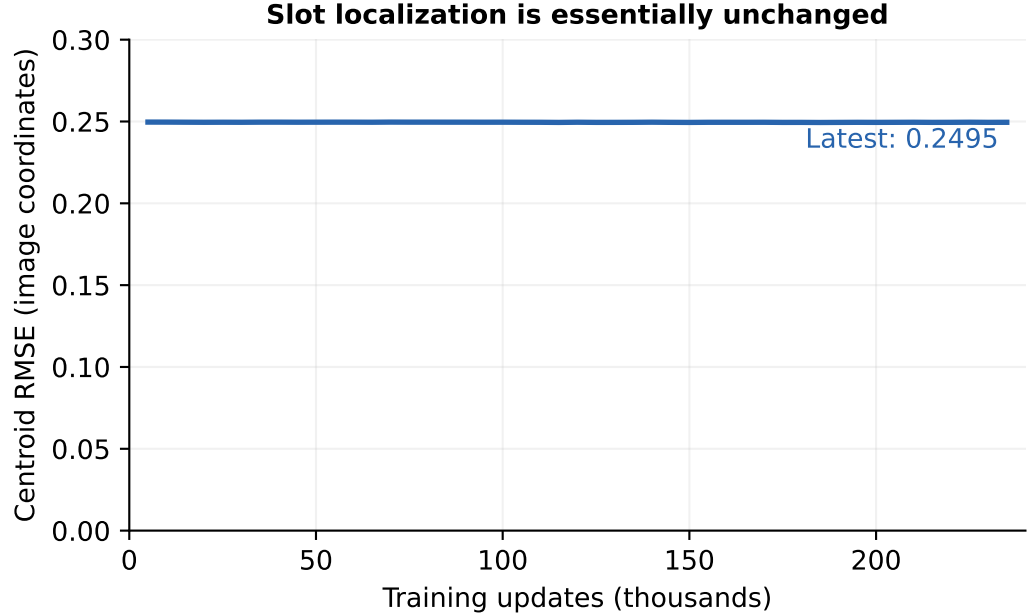
Latent scale and raw errors keep growing



Short-horizon relative error improves; K30 stays flat



Slot localization is essentially unchanged



W&B snapshot: 8 Sep 2026, 09:04 UTC · 64 held-out episodes per evaluation · Error/variance ratios are post-hoc diagnostics, not the training loss.
